

Industrial Scale Service

Trusted Scale Maintenance Ensures Proper Operation

Atlantic Scale has been maintaining and calibrating industrial scales for the pharmaceutical, food, chemical, flavor and fragrance industries since 1979. We are both ISO 17025 – A2LA laboratory accredited and ISO 9001 registered. The scope of our scale services ranges from tank scales, truck scales, floor scales, portable scales, bench and counting scales. With over 46 factory trained technicians we pride ourselves on both our technical competence and responsiveness. All scales are calibrated and tested with NIST traceable certified weights appropriate for the range and accuracy of the respective unit under test.

INDUSTRIAL

With safety at an utmost importance in all plants, Atlantic maintains a formal safety program in place with the respective safety manual. A strong safety policy is enforced and adhered to along with an insurance policy that provides a substantial umbrella coverage. In addition to all of that, we still recognize the importance of complying with your safety rules and regulations.

In order to minimize sudden equipment failure and to keep equipment performing to its utmost efficiency and respective tolerance, a regularly scheduled maintenance and inspection program is often put into effect. Our Services were developed with your calibrations needs in mind. We offer tiered service levels that give you just the right mix of service, from basic preventative maintenance to ISO 17025 services with MinWeigh & measurement Uncertainty Documentation. We look forward to speaking to you about your service needs.
