

Precision Weights & Weight Calibrations

CALIBRATION WEIGHTS

New Weights and Weight Sets

- Analytical & Micro 200g-1mg, 100g-1mg, 100g-10mg Sets
- Individual Cylindrical & Grip Handle Weights for Top-Loading and Precision Balances
- Custom Sets available to fit your specific requirements
- Calibrated Weight Stainless Steel Carts for Heavy Capacity Weighing

Detailed Calibration Reports and NIST Traceable Certificates

- On-line accessible & back up certs available upon request
- Data includes Air Density, As Found & As Left and Uncertainty Values
- Laboratory Accredited Reports for ISO/IEC 17025 & ANSI/NCSL Z540-1

Mass-Lab

Temperature and Humidity Controlled

- Specifically designed and constructed to eliminate effects from vibration and static
- State of the art Mass Comparators providing the capability to calibrate Class 1, Class 0, and Ultra Class weights

Customer Service and Expertise

- Standard 5-7 day turnarounds
- Expedited 1-2 day turnarounds when needed
- Technical Personnel are trained and certified by NIST
- Over 20 years of providing Mass Measurement Services
- Participating member of NEMAP (NorthEast Measurement Assurance Program)

Which Accuracy Class best fits your requirements?

APPLICATION	RECOMMENDED WEIGHT CLASS
Micro and Ultra Micro Balance	ASTM Class 0 & Ultra Class
Analytical Balances	ASTM Classes 1, 2 & OIML Class E2
For Top Loading Balances	ASTM Classes 3, 4 & OIML Classes F1, F2
